## 👷‍♀️ Engineering Experience

**Software Engineer @ Tempest** *(April 2021 - Jan 2022)*
Series A startup empowering people to quit drinking and build a life they love through a digital recovery program.

- Wrote code in multiple architecture layers, including the application core and integrations with external services.
- Led full-stack implementation of new Salesforce product in Stripe payment flow increasing monthly coaching revenue by 22%.
- Rebuilt marketing homepage with reusable React components styled with Sass reducing daily bounce rate by 8%.
- Ownership of all technical and process documentation in Confluence for the fully remote Agile engineering team.
- *Technologies used:* React, Ruby on Rails, GraphQL, Apollo, Sass, Jest, Gatsby, Prismic, Styled Components.

**Software Engineer @ The Graide Network** *(Jan 2019 - April 2021)*
Early stage startup matching K-12 schools with teaching assistants for enhanced feedback on student writing.

- Become sole engineer after CTO's departure in 2020 and handled all product planning, feature development, and bug fixes.
  - Led weekly meetings to triage issues, plan product roadmap and set quarterly OKRs for fully remote team.
- Built multiple greenfield full-stack features with Angular/Laravel such as:
  - Self-service onboarding for new users reducing time spent by Partner Success team doing live onboardings by 76%.
  - Quality check tool which increased total percentage of assignments quality checked by Operations team by 18%.
  - Teacher dashboard to track assignment progress contributing to a 10% increase in assignment usage.
- *Technologies used:* Angular, TypeScript, Laravel, Forge, NgRx, Docker, MySQL, Bootstrap, Azure.

**Teaching Fellow @ Fullstack Academy** *(Sep 2018 - Dec 2018)*
Coding bootcamp teaching full-stack JavaScript during 12-week cohorts located in Chicago.

- Selected for 4-month paid teaching fellowship based on academic performance, peer recommendations, and technical interviews.
- Taught daily workshops for 75+ students, provided feedback in code reviews, and managed student projects.
- *Technologies used:* React, Node, Redux, Express, Postgres, HTML, CSS.

## 📚 Projects

**Software Engineer + Product Manager @ Plyant** *(Sept 2022 - Current)*
DApp to help small-scale farmers in developing countries document and transfer land rights.

- Leading a team of 5 building on the Algorand blockchain for the Algorand Greenhouse Hack 2.
- Received a full travel scholarship from the Algorand Foundation and HER DAO to attend pre-hack events in Bali and Singapore.
- *Technologies used:* Next, Reach, Tailwind CSS.

## 🎓 Education

**11-week coding course** focused on Solidity.
ConsenSys Blockchain Developer Bootcamp - Remote *(Current)*
*Received full scholarship as a MGD DAO Fellow*.

**8-week coding course** focused on Reach.
Ascent Lunar L1 Bootcamp - Remote *(Current)*

**12-week DeFi course** helping women go from crypto curious to confident.
SheFi - Remote *(Current)*
*Received full scholarship as a SheFi Scholar*.

**7-week course** onboarding entrepreneurs to sextech.
SexTech School - Remote *(Current)*

**12-week intensive coding course** focused on fullstack JavaScript.
Fullstack Academy - Chicago, Illinois, USA *(Fall 2018)*

**Bachelor of Arts** in Human Sexuality, Magna Cum Laude.
University of Hawaii at Manoa - Honolulu, Hawaii, USA *(2010 - 2014)*

## 💃 Interests

**Member @** Surge, Developer DAO, SheFi, Boys Club, The Clinic *(Current)*

**Co-Founder @ Chicago Queer Sober Social** *(Dec 2019 - Nov 2020)*
Hosted virtual and in-person social events in Chicago for sober curious LGBTQIA+ and non-binary folx.

- Events drew 100+ attendees and were featured in the Chicago Tribune and NBC News.

**60-hour crisis intervention training** to assist sexual assault victims.
Resilience - Chicago, Illinois, USA *(Spring 2020)*
